☐ Declassified

25X1X

1. On 22 September 1951, a board fence was being built around the radio installation near the Blanken Teich in Jueterbog. * It appeared that preparations were to protect the radio installation during the winter. 25X1C

2. On 26 September, 33 twin-jet aircraft and 1 single-engine plane were observed at Jueterbog-Altes Lager airfield. 25X1

The total number of aircraft stationed at the field was probably not observed as part of the field was obstructed to view. At 3:45 p.m., six jet planes took off. At the same time, four additional jet aircraft of the same type were observed aloft.

3. A wire fence was observed along the eastern edge of the field. Two telephone lines ran along this wire fence and probably went to a radio truck on the landing field. One line was supported by sticks in a makeshift way while the other line was suspended on wooden poles. The southern section of the field was bordered by a wooded area and a strip of bog 5 meters wide. Two low wooden buildings were connected by a telephone line. Source believed that the two buildings were radio installations. 25X1
